Subject: Purchase of Cisco Networking Equipment in FY2014

The Information Technology Department is requesting to purchase Cisco Network Equipment through DIR Contract DIR-SDD-1372. We have chosen to go through Netsync Network Solutions for this equipment. This is for the replacement of Cisco network equipment that is End of Life. This equipment is in various locations throughout the city. The locations that we are looking to replace all or some of the equipment at this time is: City Hall, Central Fire Station, Police Department, Parks and Recreation-Main, Parks and Recreation-Annex, Frisco Athletic Center, Court, Museum, Public Works, Simms-Moore, and Senior Center. This was budgeted for in the FY2014 budget in the amount of \$253,333. We are looking to spend \$247,596.07 of this amount at this time.

The attached items are the equipment quote pricing for the different bill of materials that we are looking at purchasing. Also attached is a spreadsheet showing what locations will have equipment replaced as well as the quantity being replaced.

We request this be placed on the next City Council agenda for consideration.
